Format report

The labels will appear in Word, Open Office or other RTF-Capable software you're using to view your reports. At this point, you can print the labels as you would any other document.

NOTE: When printing, you will see a pop-up message saying: "The margins of section 1 are set outside the printable area of the page. Do you want to continue?" **Click** "YES"

Suggested report selections for specific labels:

Item labels for SPECIFIC LIBRARY - new items added on specific date by specific profile

Title tab: **Date modified / Modified by** Item tab: **Library / Date created**

Item labels for ALL LIBRARIES IN DISTRICT - new items added on specific date by specific profile

Title tab: **Date modified / Modified by** Item tab: **Date created**

Item labels for SPECIFIC LIBRARY - new items added after a specific date by specific profile

Title tab: **Date modified / Modified by** Item tab: **Library / Date created (range)**

Spine labels for SPECIFIC LIBRARY - new items added after a specific date by specific profile

Title tab: **Date modified / Modified by** Item tab: **Library / Date created (range)** Output tab: **spine labels**

Troubleshooting Label Problems

There are a few common problems that can be experienced when producing labels. These problems are very easy to correct.

1. Labels do not line up properly on the label paper.
 - a. Make sure you **UNCHECK** the 'Format Report' option when you view the report.
 - b. Make sure you are using Word, Open Office or a 100% RTF Compliant software package to view the reports. Microsoft's WordPad is an example of an application that displays the labels fine but will not print them properly as it does not meet the RTF specification 100%.

2. Labels are unreadable or filled with strange characters.

Make sure you **UNCHECK** the 'View Log' option when you view the report.

3. Barcodes appears as numbers instead of actual barcodes.
 - a. Make sure you have the right font installed on your computer. For PCs, you must have the Free 3 of 9 font, for MACs, you must have the 39251Regular font. Fonts can be downloaded from SETUP section of manual.
 - b. Make sure you selected the appropriate 'Platform' option on the Output options screen. You must select 'PC' or 'MAC' accordingly.

4. Optional line of text is cut off or does not display at all.

Shorten the line of optional text and ensure no special characters (CTRL Characters) are entered.

5. The font on the spine labels is too small or too large

Change the font size value on the Output Options screen

6. For Spine labels printed horizontally on label:

When viewing in WORD, select text to be changed, go to Format > "Text Direction..." and pick one of the sideways orientations.

Label stock:

Barcode labels: 1" x 2 5/8" (30 to a page) Avery 5160

Spine labels: 1 1/2" x 1" ; 8 across, 7 down (56 to a page)
